

CipherLab Barcode Scanners to Speed National Employment Application Processes in the Czech Republic

Reseller CodeWare wins 10,000+ unit order for CipherLab products, increasing company's AIDC market dominance in Eastern Europe

Taipei, Taiwan — August 1, 2006 — CipherLab Co. Ltd. (Taiwan OCT: 6160), a leading innovator in Automated Identification and Data Capture (AIDC) for the retail, government, office, warehouse and distribution markets, today announced that the Czech Republic's Ministry of Labour and Social Affairs has selected its barcode scanner products for use in processing national employment applications at all of the country's official Employment Offices. Over 10,000 units of CipherLab's 1000 CCD Barcode Scanner, and an additional 900 units of CipherLab's 1166 Bluetooth Wireless Scanner, are now deployed throughout the Czech Republic – increasing CipherLab's market share and reputation as the dominant provider of AIDC equipment in Eastern Europe.

Prague-based authorized reseller and distributor CodeWare secured the follow-on sale of over 8,000 CipherLab units after the successful completion of a 2,000 unit pilot program last year. Beginning in late 2005, the Ministry of Labour and Social Affairs used CipherLab's products for six months to schedule deliveries and installations at its many Employment Office locations.

“There were many reasons for the Ministry's selection of CipherLab's products,” explained Vladislav Zvelebil, owner of CodeWare. “The 1000 CCD Barcode Scanner not only meets the software and hardware compatibility requirements of the Czech Republic's Employment Offices, it has proven to be completely reliable. The quick and competent technical support provided by CodeWare was also a very important factor.”

CodeWare has represented CipherLab products in Eastern Europe since 1997. For more information, visit the company's website at <http://www.codeware.cz> or the CipherLab global website at www.cipherlab.com.

ABOUT CIPHERLAB

CipherLab is a global leader in the design, manufacture and marketing of AIDC (Automatic Identification and Data Capture/Collection) products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. CipherLab is headquartered in Taipei and publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160), with operations in EMEA, the Americas, Asia Pacific and China. More can be found on the web at <http://www.cipherlab.com>.
