CipherLab Debuts Industry's First Handheld Scanner with Three-Way Stand for Added Versatility and Value

The CipherLab 1500 offers speed and stability at an affordable price point to meet the data capture needs of the retail, healthcare and public sector markets

Taipei, Taiwan — May 6, 2008 — CipherLab (TWO: 6160), a leading innovator in Automated Identification and Data Capture (AIDC) for the retail, warehouse, healthcare, government and distribution markets, today unveiled the CipherLab 1500, a snappy new handheld scanner designed specifically to meet the needs of the retail, healthcare and public sector markets. The lightweight and ergonomic 1500 optionally offers the industry's first three-in-one stand, a unique and versatile innovation that enables the 1500 to be wall-mounted, placed on a desktop or utilized as an elevated auto-sense scanning unit – making it the ideal choice for the checkout counter, the manufacturing line or other high-usage environment.

The speedy CipherLab 1500 is the latest addition to the company's high value linear image scanner product line, delivering a high return on investment through improved worker efficiency and accuracy, minimized repair and maintenance needs and complete reliability backed by CipherLab's five-year warranty. It includes ScanMaster, a comprehensive software tool for custom scanner configuration, at no additional cost.

Other notable product features include:

- a fast 200 decodes/sec for high productivity
- stylish, lightweight design to minimize repetitive movement injuries
- laser-free reliability with no moving parts for reduced maintenance
- support for all widely used barcode formats
- compliance with all major global EMC regulations

"CipherLab understands the unique data capture system needs of its customers, particularly those within the retail, healthcare and government sectors," said Sherman Chuang, President and Chief Administrative Officer of CipherLab. "Durability, ease of use and minimal maintenance – even in demanding work environments – are essential product requirements that the 1500 has been designed to deliver. In terms of performance, it's simply one of the best scanners available on the market today."

Visitors to the 2008 International Logistics and Materials Handling Exhibition (SIL), being held June 3-6 in Barcelona, Spain, can get a first look at the CipherLab 1500 scanner in booth C262 in Hall 3.

About CipherLab

CipherLab is a global leader in the design, manufacture, and marketing of Automatic Identification and Data Capture/Collection products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. Operating worldwide, CipherLab is

headquartered in Taipei, Taiwan with offices in China, Germany, the United Kingdom and the USA and is publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160). For more information, please visit <http://www.cipherlab.com>.
