CipherLab Selected by Brazilian Post and Telegraph Corporation for Improved Mail Dispatch and Data Capture Logistics System

*CipherLab reseller Compex Tecnologia wins contract to upgrade logistics infrastructure
for the national postal service of Brazil*

Taipei, Taiwan — August 20, 2008 — CipherLab (TWO: 6160), a leading innovator in Automated Identification and Data Capture (AIDC) for the retail, warehouse, healthcare, government and distribution markets, today announced that its 9400 Industrial Mobile Computer will be deployed throughout the 3,000+ regional branches of the Empresa Brasileira de Correios e Telégrafos (Brazilian Post and Telegraph Corporation, or ECT), the national postal service of Brazil. Compex Tecnologia, CipherLab's official reseller in Brazil, won the contract to upgrade ECT's logistics infrastructure to improve shipment accuracy and efficiency.

Operated by the Ministry of Communications, ECT is Brazil's largest employer with approximately 110,000 employees. In Q4 2008, Compex Tecnologia will begin to deploy up to 4,000 units of the CipherLab 9400 across 28 regions within the ECT, helping it to more accurately process, sort and track the millions of pieces of daily mail delivered by its couriers.

"CipherLab has a long history of working with ECT through Compex Tecnologia; our products have been used within its branch offices since 2005," said Sherman Chuang, President and Chief Administrative Officer of CipherLab. "This deployment is further validation of the CipherLab 9400's increasing market traction as an affordable, rugged handheld capable of withstanding harsh environments and heavy usage."

The CipherLab 9400 supports Microsoft® Windows® CE 5.0, and is designed to simplify the tasks of those working in the retail, logistics, warehouse, transportation and field sales/services industries. A powerful yet user-friendly mobile computer, the 9400 is compliant with all popular wireless communications platforms and delivers industry-leading features such as a built-in digital camera, multi-form data input (touch screen or keyboard) and the ability to read and write RFID tags. It leads the industry in impact standards — an important consideration for the warehouse or field use environment.

About Compex Tecnologia

Compex Tecnologia is the official and exclusive distributor of CipherLab products in Brazil. Since 1999, the company has offered superior data capture solutions, customer support and technical assistance to its clients in numerous vertical industries, including retail, manufacturing, commercial, agro-industrial and finance.
