

# Overview

RK25/RK95/RS35/RS51/HERA51/9700 Shoulder Strap is for the user to hold the aforesaid device models securely and stay hands-free at the same time.

- (1) For safety purpose, it is strongly suggested that put the safety buckle in the front body.
- (2) Please feed the strap which is near the safety buckle through the strap hole located in the device bottom to make the device reader downward to prevent the light beam emitted from the reader damage your eyes.

## Installation

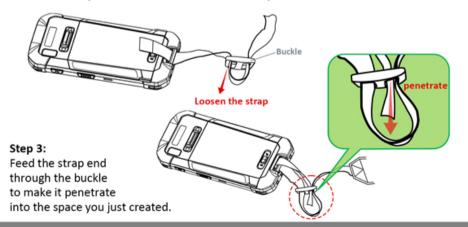

### Step 1:

Feed the strap through one of the strap holes on the device.

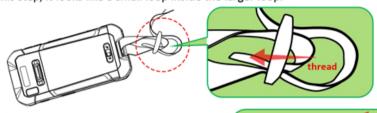

## Step 2:

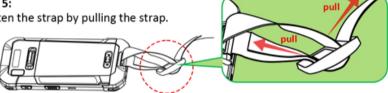

Loosen the strap from the buckle to create some space.

Step 4: Thread the short bit of the strap through the other opening in the buckle. In this step, it looks like a small loop inside the larger loop.

Step 5: Tighten the strap by pulling the strap.

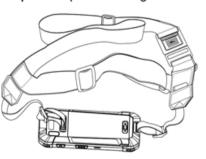

### Step 6:

Repeat the same step above to feed the other end of the strap into the other strap hole to complete installing.

Step 7: Complete attaching the shoulder strap to the device.

Step 8: After properly connecting the strap, adjust the shoulder strap from the shoulder strap buckleand the adjusting buckle to feed your need.
