CipherConnect! New CipherLab Integration Solution for More Business Applications!

Taipei, Taiwan – February 22, 2011 – CipherLab, a leading innovator in Automated Identification and Data Capture (AIDC) for the retail, warehouse, healthcare, government, and distribution industries, announces today the launch of its latest utility software – CipherConnect. Supporting Bluetooth Serial Port Profile (SPP), CipherConnect is a COM-to-key utility designed for CipherLab Bluetooth scanners to work as an input device for smart devices, such as Smartphone or PDA. The software enables intensive data collection and transmission via CipherLab Bluetooth scanner to the smart device.

"At CipherLab, we are very excited to introduce CipherConnect to our business partners. Using CipherConnect to set up a tablet and/or Smartphone to work with our Bluetooth scanner, you help utilize your business and mobilize your resources for less time, energy and cost," said Sherman Chuang, President of CipherLab. "Now that's what we call smarter business."

CipherConnect is now available for Android, BlackBerry and Windows Mobile via Bluetooth SPP (Slave). Apple's iPhone, iPad, and iPod touch (2nd Gen) that running iOS 4 and above, CipherLab Bluetooth scanners can be paired directly via HID profile where CipherConnect isn't needed.

About CipherLab
CipherLab is a global leader in the design, manufacture, and marketing of Automatic Identification and Data Capture/Collection products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. Operating worldwide, CipherLab is headquartered in Taipei, Taiwan with offices in China, Germany and the USA, and is publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160).
