CipherLab and SOTI Form a Stellar Mobile Device Management Partnership

Taipei, Taiwan –January 13, 2011 – CipherLab, a leading innovator in Automated Identification and Data Capture for the retail, warehouse and distribution markets, and SOTI Inc., developer of mobile device management/advanced security and support software, today announced the release of SOTI's MobiControl V8 for CipherLab's 9300 and 9600 devices.

SOTI MobiControl is the world's leading Mobile Device Management, Helpdesk, Security and Tracking solution that optimizes operations and productivity with its rapid and reliable performance over any network and with any size of deployment. It is compatible with both consumer and ruggedized devices and is available in multiple languages including English, French, German and Japanese. MobiControl Version 8 provides enterprises with ultimate control over their mobile field-force with a host of new features such as a Web Console to enable anytime anywhere access, and rapid provisioning by scanning a barcode, powered by SOTI MobiScan.

 "The partnership with SOTI is an important one for CipherLab. It simplifies the deployment of complex systems with higher security required by big business locally and worldwide." indicated by Ralph John Hossary, Vice President Global Business Solutions of CipherLab, "This gives CipherLab a great opportunity to include large scale deployments market to its existing client base."

Supported by SOTI's MobiControl software, the 9300 and 9600 series by CipherLab offer customers increased productivity, security, and reliable solution to meet the needs of warehousing and filed workers anytime, anywhere. Both run with embedded Windows CE, 9300 and 9600 series mobile computers provide multiple choices of barcode readers, and CCX certified Summit WLAN module. CipherLab 9600 series also offers options of WWAN, GPS, digital camera, and the ability to read and write RFID tags. The 9300 and 9600 series lead the industry with up to eight hours of battery life in WLAN mode, and are rugged enough to surpass tumble test and drop impact standards–important considerations for demanding conditions of the warehouse and field-use environments.

About CipherLab

CipherLab is a global leader in the design, manufacture and marketing of automatic identification and data capture/collection products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. Headquartered in Taipei, Taiwan with offices in the USA, China and Germany and operations worldwide, CipherLab is publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160).
